DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-12, and 16-17 are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: Both Witschel (USPN 6640207) and Crespo et al. disclose a method of adapting an n-gram language model for a new domain, the method comprising: receiving background data indicative of general text phrases not directed to the new domain (*large text database in the left branch in figure 2, page 825, or referring to step 1 in left column, page 825*); receiving a set of semantic entities used in the new domain and organized in classes (*task-dependent sentences in the right branch in figure 2, page 825 or referring to steps 2-3 in left column, page 825*); receiving adaptation data indicative of text phrases used in the new domain (*tagged sentences in figure 2*); generating adaptation n-gram class count data based on the adaptation data and the semantic entities and classes thereof (*class-bigram to word-bigram converter in figure 2*). Both Witschel and Crespo et al. fail to specifically disclose generating background n-gram class count data based on the background data and the semantic entities and classes thereof; training a language model based on the background n-gram class count data and the adaptation n-gram class count data (*LM interpolation in figure 2*); and embodying the language model in a tangible form; receiving background n-gram class count data correlated to classes of the set of semantic entities and based on adaptation data indicative of general text; wherein training the language model comprises computing background word count data based on the background n-gram class count data and the set of semantic entities, computing

adaptation word count data based on the adaptation n-gram class count data and the set of semantic entities, and smoothing the n-gram relative frequencies. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify Crespo et al. in order to obtain the claimed invention. Therefore, claims 1, 3-12, and 16-17 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
